

3 Axis Permeability Tester for Geosynthetics Geotextiles

Description

AHP PLASTIK MAKINA

- Test specimen diameter: Î¦100mm
- Test specimen thickness: Up to 50mm
- Pressure method: Air pressure
- Cell pressure: 0~600kPa
- Continuously adjustable
- Influent/effluent pressure: 0~550kPa
- Continuously adjustable
- Pressure display: Digital
- Pressure regulating method: Manual
- Flow measurement: Burette pipette
- Cell: Transparent
