

Carbon Analyzer

Description

- Hoses and connectors included //
- Chemical materials included //
- Pyrex trap for pyrogallol //
- Special sample movement rail system //
- U Pyrex pipe for Silica gel //
- Silica gel is included //
- Sample boat (alumina) 1 pcs //
- Double sliding quartz tube //
- Quartz tube end caps //
- PID digital temperature controller //
- Digital timer //
- Highly insulated furnace //
- Temperature up to 900°C //
- Pyrogallol pellets and potassium hydroxide is included//
- Hoses included //
- N2 rotameter //
- Training video //
- Customer need high purity N2 gas balloon and double gage pressure regulator for testing that is not included //
- Including aluminum blocks for gas connections
