

Crush Squeeze Tester for PE Pipes and EF Fittings-315mm

Description

AHP PLASTIK MAKINA

- Size range is up to 315mm //
- According to ISO 13955 for Crushing decohesion test for polyethylene (PE) electrofusion assemblies //
- Suitable for squeeze-off test of HDPE pipes //
- Hydraulic system //
- Movable plate speed adjustment using frequency inverter //
- Chrome plated guide shafts //
- Stop position setting by special switch //
- Power is single phase 220VAC //
- Compression platens according to ISO 13955 //
- Hydraulic system Max pressure adjustment //
- Speed adjustment of compression platen to 100 mm/min Â± 10 %
