

Halogen Acid Gas Content Tester According to IEC 60754-1

Description

- Digital timer //
- Flowmeter //
- PID temperature controller //
- High-temperature sensitivity //
- Sample holders available //
- Coated with electrostatic powder paint //
- Operating voltage: 220V, 50 Hz. //
- pH-meter and Conductivity-meter (optional) //
- Resolution (pH-meter): 0.1 //
- Precise balance $\hat{A}\pm 0,1$ mg-220g (is as option) //
- Length of heating zone is 480mm //
- Internal diameter of quartz tube 36 mm //
- Resolution (conductivity-meter): 1 //
- Quartz tube //
- 20 ml pipette //
- Volumetric flask 1000 ml capacity //
- 100 ml pipette //
- Chemicals are not included //
- Burette in accordance with ISO 385-1 //
- Wash bottles at least 220 ml //
- Conical flask with 250 ml to 500 ml capacity //
- Sliding sample holder for easy placement of sample inside tube //
- Alumina sample boat
