

High Pressure Hydrostatic Pressure Test Setup

Description

- High pressure pneumatic pump
- It is in 3 different models 1000 bar, 1500 bar and 2000 bar
- Control based on PLC, PC
- 19" monitor with ERGO arm
- Test water tank
- Temperature control of water tank
- Water circulation system of water tank
- PID control for temperature
- SS304 test tank
- High pressure quick connect hoses for samples connection
- Windows based software
- Logging and monitoring of data in computer
- Connectors and fittings are high pressure SS
- Pneumatic automatic door for water tank
- Reporting in MS WORD
- Water purifying system
