

Hot Press (Hydraulic Type)- Sheet Making from Plastic Granules-300 Micron Sample Thickness-100KN

Description

- Hot press for making sheets from plastic granules //
- 3-inch touch panel //
- Pressure monitoring //
- Machine is a hydraulic type //
- Water-cooled heating plates //
- Cooling rate control is by manual water valve //
- Including 100*100 mm mold-0.3mm thickness //
- 100KN force capacity //
- Thickness of mold is 0.3mm //
- Mould is a flash mold type //
- PLC control panel //
- Cartridge-type heating elements //
- Plate movement speed adjustment using a flow control valve //
- Laboratory chiller and an Oven is needed that is not included. Ask for quotation in case of need
