

Hot Water Bath for Hydrostatic Pressure Testing

Description

- According to ISO 1167 , ASDTM D 1598 , ASTM D 1599
- Pneumatic door
- Water circulation
- Digital temperature controller
- Elastomeric foam insulation
- SS304 for contact surfaces with water
- Outer body is powder coated paint
- Have a level control that ensures that the test medium is topped up automatically
- It has over-temperature shutdown separate control circuit
- The special circulation system guarantees high accuracy and uniform temperature distribution
- The double insulation of the bath walls
- Special seals keep steam in the test bath
- Pneumatic operated doors
- Quick-release couplings connections inside the bath
- High-quality stainless steel SS304
- Option to connect a chiller for 20C tests
- Easy connection to pressure test units
