

Masterbatch Loss in Weight Doser for Extrusion Lines

Description

AHP PLASTIK MAKINA

- Used for extrusion lines specially for pipe, profiles ,â€¦
- Feeding masterbatch based on predefined mass feeding rate
- It can be connected to our loss in weight gravimetric system for pipe extrusion lines
- Gravimetric unit measures main line melt thruput and the doser, feeds masterbatch based on predefined percent of mixing
- Output of feeder will be as customer request
- System is coming with 7â€³ touch display or 19 Inch PC panel
- System software is integrated with main line gravimetric
- It has analog signal output and encoder for controlling puller of pipe extrusion line
- Used for granulated materials
- Industrial PLC based control
- Inline side feeding guaranties dispersion tests of masterbatch for black PE pipes
