

Single Column Tensile Compression Tester (UTM)

Description

- According to ISO 527
- Servo controlled
- Long travel extensometer (optional)
- Ball screw
- Single column with two guide shafts
- USB port for computer connection
- Windows based software including all tensile compression test functions
- Load resolution 1/10000
- Speed as per customer request
- Grips as per customer request for different products
- Easy operation and clear visualization (test curves, calculations)
- Easy to change the grips via male-female connection
- Accuracy $\hat{A}\pm 0.5\%$ of full scale
- Precise self-cleaning ball-screw
- Brush-less servo motor quarantine maintenance-free operation
